PIP Status - Recommendation 1: Engage in technical assistance with CalEQRO early and often for additional support on both PIPs. Access to Care – Recommendation: Investigate and evaluate the significant increase in

CY 2019 Approved Claims per Beneficiary (ACB) served and high costs beneficiaries (HCBs), identify strategies, and begin to implement solutions to ameliorate findings.

Timeliness of Services – Recommendation: Disaggregate and report on FC timeliness data separately from other children and youth. Recommendation 2: Track, monitor, and report on urgent appointment data. Quality of Care – Recommendation: Implement a medication monitoring plan, track and trend related data elements, and routinely evaluate and report on performance. Recommendation 2: Complete an evaluation of the current QIWP's goals and objectives for review at the next EQR. We have 335 Open outpatient charts, youth has 121 unduplicated clients for a total of 386 services and 364 server hours, adults have 153 unduplicated clients served for a total of 762 services and 665.33 hours. New Intakes were 63, crisis services were 19 and we had one 5150 case.
