

## **Background**

The following Wildfire Evacuation Maps were developed for select Plumas County Communities with potential high fire hazard. These maps contain known structures, water sources, and current road systems for each area and are designed as guidance for primary and secondary evacuation routes for individual communities.

**Use field judgment and discretion on evacuation routes identified on the maps.  
Suggested Evacuation Routes may change according to fire direction and fire behavior.**

This project is a cooperative effort involving Plumas County OES, Plumas County Sheriff's Department, Plumas County Fire Chiefs Association, US Forest Service, Cal Fire, Lassen NPS, Plumas Eureka State Park, local Firewise Communities and key residents residing in the map area.

## **Map index**

1. Bailey Creek
2. Bucks Lake\*
