# What Do We Know About Plants?

# Plant Life cycle

# The Green Project

We are going to plant our own seeds. You may take them home after 4-6 weeks or donate them to the Greenville Library Garden. I made sheets for your specific seed but feel free to do more research and check out our recommended books on plants. Don't worry about coming in to water your plants, I will water them for you. If you want a time-lapse video of the growth of your plant please let me know.

Look out! Your plant may be featured on our Library's Facebook Page!

# Time Lapse of a Bean
