# **TENTATIVE MAPS**

#### **APPLICANT'S GUIDE TO PROCEDURES**

#### WHAT IS A TENTATIVE MAP?

A division of land for the purpose of sale, lease, or finance requires submittal of a map for County approval showing the design and improvement for the proposed division and the existing conditions in and around it, as does a project where lots are not created due to an alternative method of division. This is a tentative map. Land divisions must be consistent with the General Plan, zoning requirements, development standards, and must conform with public health requirements, the Subdivision Map Act and related County ordinances, and usually must not cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat. The tentative map procedure is the method for determining if a land division meets those requirements.

The County Code provides for a land divider or his authorized agent to confer with County officials regarding a proposed division before submitting a tentative map. A PRELIMINARY CONFERENCE CAN EXPEDITE THE PROCESSING OF A TENTATIVE MAP BY IDENTIFYING THE OVERLAYING GENERAL PLAN CONSTRAINTS AND POLICIES FOR WHICH EVALUATIONS, ANALYSES, STUDIES, AND REVIEWS ARE REQUIRED TO MAKE AN APPLICATION COMPLETE.

#### WHERE TO FILE?

Planning & Building Services (530) 283-7011 555 Main Street Quincy, CA 95971

#### WHAT TO FILE?

- 1. The completed application and twenty (20) copies of a tentative map which conforms to the requirements of the Plumas County subdivision regulations available at Planning & Building Services. In most cases, the licensed land surveyor or engineer who will be doing the final survey prepares this map.
- 2. The filing fee set forth on Planning & Building Services' fee schedule. (Please Note: There are two different fees depending on whether this is an application for a new <u>Tentative Map</u> or a <u>Modification of a Recorded Map by Certificate of Correction.</u>)

#### **PROCEDURE**

A tentative map is reviewed by Planning & Building Services and evaluated, in coordination with other agencies, for consistency with the General Plan, zoning requirements and development standards, and conformance with public health requirements and the Subdivision Map Act and related County ordinances, and for the physical suitability of the site for the type and density of the proposed development, and for potential environmental impact. If your project is determined to have no significant environmental effect or to be exempt, no further review is required. If it is determined that a Negative Declaration is required, one of two fees will be charged depending on whether the Negative Declaration is prepared by staff in the Planning & Building Services Department or by a consultant. These fees, including required Fish & Game filing fees, are listed in the attached fee schedule. After the document is prepared it is circulated for public review for a period of 30 days. If an Environmental Impact Report (EIR) is required, one of two fees will be charged depending on whether the EIR is prepared by staff in the Planning & Building Services Department or by a consultant. These fees, including required Fish & Game filing fees, are listed in the attached fee schedule. After preparation, the EIR is circulated for public review for a period of 45 days.

After the appropriate review, a staff recommendation is prepared and mailed to the applicant and his engineer, surveyor, or agent. The tentative map is scheduled for the next regular meeting of the Zoning Administrator for which it can be scheduled while meeting all requirements for notice.

The decision of the Zoning Administrator is made at the public hearing. Appeals must be filed within 10 days from the date of the decision to be considered by the Board of Supervisors. The filing fee, paid to Planning & Building Services, is set forth in the fee schedule (attached).

After approval of a tentative subdivision map, subsequent to any appeal, the property is to be surveyed, and a final map is to be submitted to the County Engineer with appropriate documents or bonds. The County Engineer then records the map after the conditions of approval have been met.

For additional information, contact Planning & Building Services at (530) 283-7011.
