Dear Director Ferguson:

As a resident of Plumas County, I am concerned about a possible upcoming action by the Planning Commission, to approve a vested rights petition, as requested by US Copper Corp, for the Engels and Superior Mines, near Lights Creek.

If vested rights are granted, the mining company could proceed without needing a land use permit, which means that the California Environmental Quality Act would not apply, and potential environmental impacts from the project would not be studied.

Please ensure that our water sources will not be in any danger. Please require US Copper Corp to submit a land use permit so that environmental impacts will be carefully studied. Please do not grant their petition for vested rights.

Sally Harvey
