Notes: When ordering a septic tank, please inform the sales representative that this tank is for installation in Plumas County. A septic tank with two (2) compartment construction, equipped with water-tight access risers and gas-tight lids, and a minimum capacity of 1,000 gallons is required.

Only septic tanks included on this list are approved for installation in Plumas County. For inclusion on this list, the tank manufacturer must submit tank details including structural calculations to Environmental Health for consideration prior to purchase and/or installation.
