

Help plan for future droughts and improve our community's water resilience

Are you worried about how droughts will
impact your future water supply?

**Attend this meeting to provide input on the County's efforts to prepare
for future droughts and participate in this important planning process.**

Plumas County is developing a County Drought Resilience Plan to help small water systems and domestic wells owners better prepare for future droughts and water shortages. Being prepared helps reduce hardships and improves our community's water supply resiliency. **This meeting will focus on the County's revised risk assessment and potential short-term response actions the County can implement to support state small water systems and domestic wells during future droughts.**

Join this public meeting, in person or online with call-in and video capabilities:

Thursday, December 5, 2024

6:00 – 7:30 PM

attend in-person at:

Almanor Recreation Center

451 Meadowbrook Loop

Chester, California 96020
